Built for **post-production** teams who need clarity, speed, and control.

Plan Projects · Schedule People and Resources · Collaborate

CORE CAPABILITIES

Project Planning & Workflow Structure

Structure projects from intake to delivery with clear stages, tasks, milestones, and dependencies built for post-production teams.

- ✓ Project & task management
- ✓ Workflow stages & milestones
- ✓ Request workflows

Resource & Crew Scheduling

See real-time availability across editors, producers, suites, studios, and key resources so schedules stay aligned and conflicts are easier to avoid.

- ✓ Live availability visibility
- ✓ Better resource utilisation
- ✓ Less reshuffling

Task Tracking, Feedback & Dependencies

Assign work, manage dependencies, centralise feedback, and keep every hand-off connected so projects move smoothly from brief to final delivery.

- ✓ Task dependencies
- ✓ In-project collaboration
- ✓ Centralised feedback

Built-In Quotes & Rates

Create and manage quotes inside the project workspace with predefined rates and linked cost detail that helps teams move faster.

- ✓ Quotes linked to projects
- ✓ Predefined rates
- ✓ Faster turnaround

Connected Workspace

Cirkus combines scheduling, communication, requests, and project updates in one media-focused workspace designed for collaboration.

- ✓ Collaborative communication
- ✓ Request workflows
- ✓ Dynamic task grid view

Web, Mac & iOS

Available on the web, as a native Mac app, and on iOS so teams can stay connected and productive from anywhere.

- ✓ Web availability
- ✓ Native Mac app
- ✓ iOS access on the move

WHY CIRKUS

The best project management tool for post-production workflows

Structure the whole project from intake to final delivery

Cirkus helps teams define each project stage, task, milestone, dependency, and associated quote from the start.

Keep resources aligned in real time

Editors, producers, studios, and suites can be scheduled with current availability in view, reducing clashes and bottlenecks.

Bring reviews, approvals, and updates into the project

Feedback stays connected to the work instead of being buried across email threads and chat messages.

Give every stakeholder the right level of visibility

Management can see the big picture while crew members focus on the daily tasks and updates relevant to them.

"Cirkus helps us do what we do more effectively and with greater awareness of our resource availability and utilization. Hope to never go back to our pre-Cirkus world."

— Arizona Public Media

"For me, I use it extensively for creating quotes. It saves probably 90% of the time it used to take manually creating quotes. I can quickly drag and drop and create predefined pricing for various elements."

— Blue Juice
